ABOUT ME

Motivated second-year B.Tech Computer Science undergraduate at SRM University, Chennai, with a strong interest in software engineering and data-driven solutions. Skilled in Java, C++, and front-end technologies, with experience in hackathons, applied ML projects, and internships.

EDUCATION

SRM Institute of Science and Technology, Chennai August 2024 – July 2028
Bachelors of Technology in Computer Science

Father Agnel School, Noida April 2010 – March 2024
Schooling – Senior Secondary in Science (PCM Stream)

EXPERIENCE

Infogain, Noida Sector-63 June 2025 – July 2025
Summer Intern

- Analysed a **NetSPI vulnerability assessment report** of a client website, identifying additional vulnerabilities and recommending enhanced remediation strategies.
- Contributed to strengthening the organization's **application security practices** by documenting risks and suggesting preventive measures aligned with **OWASP Top 10 guidelines**.
- Built a **Java-based internal module** applying Object-Oriented Programming (OOP) principles to simulate **employee data management** (CRUD operations, access control, and reporting), enhancing understanding of enterprise-level application design.

PROJECTS

UniVoice   | HTML, CSS, JavaScript, MYSQL

- Built an E-Counselling platform to connect high school graduates with college mentors.
- Worked collaboratively in a 24-hour hackathon; placed in top 7 teams.
- Pitched it to the Entrepreneurship Cell and received praise for innovation.

Sepsis Prediction Model  | Python, Pandas, Scikit-learn, Matplotlib

- Built a machine learning model to predict early signs of sepsis using patient vital data.
- Performed data preprocessing, feature engineering, and classification using Random Forest and XGBoost.
- Achieved high accuracy in early detection; visualized trends and feature importance for clinical interpretability.

SKILLS

Languages & Web: Java, C, C++, HTML, CSS, Python

Tools & Design: GitHub, Git, Figma, IntelliJ, Eclipse, Jupyter, Postman API

CS Fundamentals: Object-Oriented Programming, API Testing

Other Skills: Team Management, Problem Solving, Analytical Thinking

LEADERSHIP AND VOLUNTEERING

Campus Partner, Perplexity AI | August 2025 - Present

- Representing Perplexity AI at SRM University to promote AI awareness and engagement among students.

Participant, McKinsey & Company – Forward Program | September 2025 - Present

- Selected for McKinsey's global flagship program focused on structured problem-solving and digital leadership..
